

Dr. Paula Alexander-Delpech

Assistant Professor
Department of Family, Community, and Health
System Science
College of Nursing

Dr. Alexander-Delpech received her BSN and MSN from Florida International University and her Ph.D. from Barry University. Dr. Alexander-Delpech's main research focus is the delivery of culturally appropriate breast cancer awareness initiatives to low- and middle-income countries (LMICs) through high-quality, community-based education and contemporary eHealth. She has developed and led several faculty-led study abroad programs to countries in the Caribbean. Most recently, Dr. Alexander-Delpech developed and led a community-based culturally appropriate breast health awareness program in Grenada. The program was guided by a community-based philosophy of health care and social planning. The program trained Lay Community Health Workers (LCHW) in breast health and how to train women to conduct breast self-examinations.

Global Research Interests

- Women's Health
- Breast Cancer
- Health Behaviors and attitudes
- Health of Indigenous people of the Caribbean
- Utilizing mHealth to increase compliance

Countries of Focus

- Grenada
- Trinidad and Tobago
- Guyana
- Barbados
- Dominica
- Caribbean Region

Mentor: Dr. Linda Haddad

Associate Dean of Academic Affairs, College
of Nursing
