Finding Funding & Limited Opportunities

Maura Pedersen -- Division of Research Program Development, Office of Research
Today we will discuss:

- Services provided by the Division of Research Program Development
- Resources for finding funding opportunities
- Limited submission programs
Division of Research Program Development

› Find Funding for Research
› Coordinate Limited Submission Opportunities (more later!)
› Support Large Proposal Submissions (>$1Million)
› Promote Industrial Outreach
› Coordinate Internal Grant Programs

› See more information at our website: http://research.ufl.edu/faculty-and-staff/finding-funding.html
Finding Funding

› Identify what type of activity needs support (research, conference planning, conference travel, equipment, etc.)
› Develop keywords (broader is always better)
› Search databases
› Google
› Sign up for email alerts
› Request a project-specific funding search (http://research.ufl.edu/faculty-and-staff/finding-funding/request-a-funding-search.html)
Federal Funding Alerts

› NSF (Daily or Weekly)

› NIH Guide Table Of Contents (Weekly)

› Grants.gov (Daily)
Foundation Funding Alerts

› Foundation Center
  – RFP Bulletin (weekly)
  – Funding Watches (choose arts, health, or education)
  – Available at http://www.foundationcenter.org/ (under “Newsletters”)

› Philanthropy News Digest (daily)
  – http://philanthropynewsdigest.org/rfps
What is a Limited Submission Opportunity?
Sponsors frequently restrict the number of applications an institution can submit in response to a given funding opportunity.

Information can commonly be found in the Eligibility, Submission Instructions, or Summary sections of solicitations, but may appear elsewhere, as well.

Sponsors don’t always say what they mean! Sometimes we have to read between the lines.

Established guidelines for selecting the proposal (or proposals) to be submitted and internal coordination procedures are posted as early as possible. Sometimes deadlines are short!
Limited Submission Programs

Guidelines:
http://research.ufl.edu/faculty-and-staff/finding-funding/limited-submission.html

Process:
1. Announced by the Division of Research Program Development
2. Letter of Intent requested -- Coordination could be through different units on campus
3. Concept papers/Preliminary Proposals
4. Reviewed by faculty committee
5. Approved by Vice President for Research

IMPORTANT!
• If you come across an institutionally limited opportunity, for which internal guidelines have not yet been published, please contact programdevelopment@research.ufl.edu as soon as possible.
• Also—an email goes out each week, listing Limited programs that have passed the internal deadline and received no letters of intent. First come, first served! Contact us to receive these emails.
UF Funding Opportunity Manager (OppMan)

http://research.ufl.edu/funding

› Updated weekdays with opportunities for which UF is eligible
› Includes federal, state, foundation, and UF-internal funding opportunities
› Focuses on research funding opportunities for faculty, with some for postdocs and students
› Sign up for email digest of opportunities, published by category
› Refer to our User’s Guide:
  http://research.ufl.edu/research-program-development/research_program_development_docs/OppManUserGuide.pdf
› This is where UF posts guidelines for internally-coordinated limited submission opportunities – always check here before applying!
Sign Up for OppMan Email Digests

› Go to: http://research.ufl.edu/funding
  - Log in with your UFID and password (in the top right corner)
  - Click on the Subscription tab
  - Select categories of funding opportunities and frequency of delivery
  - Save your preferences
You cannot unsubscribe from Special Announcements and Limited Submission Opportunities.
Title: OJJDP FY 16 National Girls Initiative
Sponsor: Department of Justice (DOJ)
Published: 01/05/2016
Category: Limited Submission, Arts, Humanities, Social Sciences & Education
FOA: OJJDP-2016-9138

Internal LOI instructions
Deadline field reflects due date for internal LOI

Many girls experience violence, trauma, poverty, and racial, ethnic, and gender bias that can lead to their involvement in the juvenile justice system. OJJDP believes that the needs of girls must be addressed in a developmentally appropriate manner. This means recognizing a young woman’s diverse pathways into and out of the system (e.g., Juvenile justice and child welfare) and limiting juvenile justice involvement to only those who pose a risk to public safety. Then, for these very few girls and young women, it means reducing reliance on secure placement and increasing gender and culturally responsive, trauma-informed, and developmentally appropriate approaches. OJJDP recognizes that for girls and young women, this requires a national commitment to creating healthy social environments with family, peers, community, social institutions, and society.

Improving system and programmatic responses to girls and young women is an urgent need and requires engaging a broad array of stakeholders. These include state juvenile justice specialists, state advisory groups, girls’ alliances and coalitions, advocates, law enforcement officers, prosecutors, juvenile defenders, probation officers, victim service providers, researchers, and most importantly, girls, young women, and their families.

The selected applicant will serve as OJJDP’s principal technical assistance provider addressing girls and their involvement with the juvenile justice system.

UF may submit only one application for this opportunity.

Faculty interested in applying should submit an internal Letter of Intent (LOI) [click here for guidelines] to the UF Office of Research (Attn: Jeewan Jyot, limitedprograms@research.ufl.edu) by Jan 19, 2016 for internal consideration. Full applications are due to Department of Justice by Mar 8, 2016.

Deadline: Internal Deadline 01/19/2016 Internal Letter of Intent (Required).

Let’s Review Some RFPs!
The purpose of this program is to foster the next generation of global health scientists in the U.S. and in low and middle income countries (LMICs) by giving scientists, early in their careers, a mentored research training experience in global health at established biomedical and behavioral research sites in LMICs. In addition, it seeks to enhance research capacity at the foreign research sites by providing financial support and training for young researchers at those institutions.
National Institutes of Health (NIH) Fogarty Global Health Training Program (D43)

› Is this program limited?
› Is internal UF coordination required?
› Is a letter of intent to the NIH required?
The United States-Israel Collaboration in Computer Science (USICCS) program is a joint program of NSF and the United States - Israel Binational Science Foundation (BSF). The program supports research projects that develop new knowledge in the theory of computing; algorithm design and analysis; design, verification, and evaluation of software systems; and revolutionary computing models based on emerging scientific ideas.
National Science Foundation (NSF)
